jersonmartinez.com

Senior IT and Cloud Infrastructure Engineer with 9+ years of experience designing, implementing, and managing hybrid infrastructures (on-premises and cloud) on AWS, Azure, and GCP. Specialized in the design and administration of enterprise platforms using Infrastructure as Code (Terraform and Ansible), administration of Linux and Windows Server platforms, virtualization, Kubernetes, Docker, and enterprise services such as Microsoft Entra ID, DNS, DHCP, and Active Directory. I have led projects involving technology modernization, Landing Zones, cloud migrations, high-availability strategies, disaster recovery, capacity optimization (right-sizing), and infrastructure governance in accordance with ITIL and ISO 27001 best practices. **I hold 10 international certifications in AWS, Azure, DevOps, and Cloud Architecture, focused on the design, operation, and modernization of enterprise platforms.**

EXPERIENCE

DevOps Tech Lead
MindTech - Nubity — *October, 2025 - Present*

- I lead projects involving the design, implementation, and modernization of hybrid infrastructure (on-premises and cloud) for high-profile clients in Latin America, managing AWS and Azure platforms using Infrastructure as Code (Terraform and Ansible). I lead Landing Zone initiatives, AWS MAP programs, ETL migrations, GenAI solutions, and strategies for high availability, disaster recovery, governance, and cost optimization (FinOps and right-sizing), strengthening the resilience, security, and scalability of enterprise platforms.
- I also lead the adoption of Generative AI tools and engineering workflows, integrating RAG solutions, multi-model platforms, and AI-assisted development practices across enterprise environments.

Sr. DevOps Engineer (Consultant)
Pliret - PRB — *August, 2025 - Present*

- I work directly with **Premium Restaurant Brands (PRB)**, managing infrastructure and technology platforms on the Google Cloud Platform for brands such as KFC and McDonald's. I designed and implemented infrastructure governance using Terraform, Ansible, and GitHub Actions, enhancing automation, security, traceability, and operational continuity. I collaborate closely with development, infrastructure, and security teams to manage Kubernetes platforms and critical services.

DevOps Specialist
CodersLab — *February, 2025 - July, 2025*

- I participated in infrastructure modernization projects for Coca-Cola Andina, automating cloud platforms on AWS using Terraform and GitHub Actions. I implemented solutions using serverless services, optimized CI/CD processes, strengthened infrastructure governance, and helped improve the availability, scalability, and operational efficiency of critical applications.

DevOps Technical Leader
Hotaka iKhodi — *February, 2023 - February, 2025*

- I led teams responsible for the design, implementation, and management of cloud infrastructure for international clients such as Avianca, Flyr, SunExpress, and Cyprus Airways. I defined automation standards using Infrastructure as Code, managed Linux, Kubernetes, and Docker platforms, drove high-availability and disaster recovery strategies, and promoted best practices for security, governance, and infrastructure optimization on AWS and Azure.

DevOps Engineer
Hotaka iKhodi — *September, 2020 - February, 2023*

- I managed and optimized technology infrastructure for multiple clients, achieving a reduction of more than 60% in operating costs through automation, right-sizing, and cloud modernization strategies. I developed **Infralytics**, a platform for server management and monitoring that significantly improved operational efficiency and infrastructure management capabilities.

DevOps and DevSecOps Trainer
OpenWebinars & Udemy — *February, 2022 - Present*

- I design and teach specialized training programs in DevOps, cloud computing, Infrastructure as Code, Kubernetes, Docker, GitHub Actions, Python, and Go, training thousands of professionals in Latin America and Spain. My approach combines enterprise infrastructure management with modern practices in automation, observability, and cloud architecture.

Full-Stack Developer
Elite Online Media — *January, 2019 - September, 2020*

- I developed enterprise web solutions and helped manage GNU/Linux and Windows servers, automating deployments, strengthening application security, and improving backend performance by more than 80%. I implemented remote work methodologies and continuous integration processes that increased the team's productivity during the transition to distributed work arrangements.

SKILLS

- **Infrastructure:** Hybrid infrastructure management (on-premises + cloud), Windows Server, Linux, Microsoft Entra ID (Azure Active Directory), Active Directory, IIS, DNS, DHCP, LDAP, NTP, capacity planning, right-sizing, business continuity (BCP), disaster recovery (DRP), high availability, failover, multi-AZ, multi-region.
- **Cloud:** Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP), AWS MAP, Landing Zones, Cloud Governance, Infrastructure Modernization.
- **Virtualization:** VMware vSphere, Hyper-V, KVM, VirtualBox, Vagrant.
- **Containers and Orchestration:** Docker, Podman, WSLC, Kubernetes.
- **Infrastructure as Code (IaC):** Terraform, Ansible, Pulumi, CloudFormation, AWS SAM.
- **DevOps & CI/CD:** Git, GitHub Actions, Azure DevOps (Repos, Pipelines, Boards, Artifacts, and Environments), Rundeck.
- **Monitoring and Observability:** Grafana, Prometheus, ELK Stack, Filebeat, Telegraf, Datadog, Zabbix, SolarWinds, Nagios.
- **Storage & Backup:** AWS EBS, AWS FSx, Azure Files, AWS Backup, Azure Backup, Snapshots, Amazon Machine Images (AMI).
- **Security and Governance:** ITIL, ISO 27001, DevSecOps, FinOps, IAM, AWS Security Hub, GuardDuty, Inspector, Secrets Manager.
- **Generative AI & AI Engineering:** RAG, LLM orchestration, model evaluation, AWS Bedrock, Gemini, LibreChat, AI-assisted software engineering, prompt and context management. Kiro, Devin, Claude Code, Cursor.
- **Development:** Python, PowerShell, Bash, Go, JavaScript, PHP, HTML, CSS, SQL.
- **Databases:** PostgreSQL, MySQL, SQL Server, MongoDB, Redis, DynamoDB.
- **Languages:** Spanish (Native) • English (B1+ – Professional Working Proficiency)

EDUCATION

Certifications & Courses
A Cloud Guru, OpenWebinars, Udemy, PluralSight, LinkedIn, Crashell — *Ongoing since Dec 2017*

- **I have completed 100+ certifications** in cloud computing, infrastructure, DevOps, software architecture, cybersecurity, and development.
- **I am the author of more than 60 published** technical articles on DevOps, cloud computing, and automation.

Telematics Engineer
UNAN - León — *Jan 2013 - Dec 2017*

- Graduated with honors, defending the thesis titled "GNet, Computer Network Management Web System", earning an excellent score of 100 points.

CERTIFICATIONS

- **Amazon Web Services (AWS):**
  - AWS Certified DevOps Engineer – Professional (DOP-C02)
  - AWS Certified Solutions Architect – Associate (SAA-C03)
  - AWS Certified Cloud Practitioner (CCP)

- **Microsoft Azure:**
  - Azure Solutions Architect Expert (AZ-305)
  - Azure DevOps Engineer Expert (AZ-400)
  - Azure Administrator Associate (AZ-104)
  - Azure Security Engineer Associate (AZ-500)
  - Azure Fundamentals (AZ-900)
  - Azure Data Fundamentals (DP-900)

- **GitHub:**
  - Foundations
